_appserverx_xml_WaitResponseTimeout

Description:	**WaitResponseTimeout** parameter sets a timeout interval value in seconds for the controlling process to wait for a response from a child process. If no response within the specified time, the controlling process will decide that a child process hang up and start termination of all child processes one-by-one.
Parameter type:	Number
Default value:	60
Possible values:	10..600

```
<WaitResponseTimeout>60</WaitResponseTimeout>
```
