_appserverx_xml_AggressiveConserve

Description:	**AggressiveConserve** parameter turns on/off a special mode with aggressive memory conservation. In the turned on mode, the memory will be freed as soon as possible. This parameter is bundled with the PercentLowMemory parameter. In the enabled mode, PercentLowMemory is ignored and the system is always considered to be in the low memory state.
Parameter type:	Boolean
Default value:	OFF
Possible values:	ON, OFF

```
<AggressiveConserve>OFF</AggressiveConserve>
```
