

# **\_include\_wsc55x\_server\_apache\_webserver\_finalization\_selinux**

Congratulations! The WSC application has been successfully installed to /opt/WSC directory.

Step 10: Finalize the WSC application configuration under a chosen Web or Application Server:

If it is required, enable the rewriting options in the Apache HTTP Server configuration file.

- a. Open /etc/httpd/conf/httpd.conf file.
- b. Find "/var/www/html" directory substring.
- c. Change "AllowOverride None" to "AllowOverride All".
