

_include_wsc55x_server_configure_grammar_linux_tomcat

If the path to Java Virtual Machine (JVM) which is required for the Grammar engine is not auto-detected, the script will ask you to specify the correct path to JVM again.

Step 11: Specify Path to Java Virtual Machine.

At least Java 8 is required to use the Grammar engine. Please specify the path to Java Virtual Machine (JVM). You can skip this step and add the path to JVM manually in the '/opt/WSC/AppServer/AppServerX.xml' file (the PathToJavaVirtualMachine tag).

Do you want to specify a path to JVM? Enter 'y' or 'n' [y]:

You have an option to **skip** this step during the setup process and set a path to JVM manually. Refer to [Enabling Grammar Engine](#) guide to find out more.
