

_include_uninstall_application_licensev55x_linux

a. Deactivate a license. Refer to the [License Deactivation on Linux](#) guide for details.

Please note that if you want to install your application package on a different server, you need to deactivate your license first.

b. Run the **rm -rf** command to remove the application files:

```
sudo rm -rf <WebSpellChecker_Installation_Path>/WSC
```
