# _include_wsc55x_server_install_application_from_serviceURL_to_finish_apache_tomcat_windows
2.9. Define settings of the selected Java application server and click **Next** to proceed.

- Specify a domain name (e.g. localhost).
- Specify a port number of a Java application server. The installer will suggest the port number based on the specified protocol and selected Java application server. The default ports for Java application servers are 8080 for HTTP and 8443 for HTTPS protocols.
Provide the name of the virtual directory for WebSpellChecker service. The default value is **wscservice**.

2.10. Select WebSpellChecker **Start Menu folder** and type a program name which will be used as a Start Menu item and click **Next** to proceed.

Setup - WebSpellChecker   —   □   ✕

Select WebSpellChecker Start Menu Folder

The WebSpellChecker shortcuts will be created in the following Start Menu folder.

To continue, click Next. If you would like to select a different folder, click Browse.

WebSpellChecker   Browse...

< Back   Next >   Cancel

2.11. On this step the installer summarizes the information that you have entered on the previous steps. Click **Install** to proceed with the installation process or return to previous steps if you want to make any changes.

Setup - WebSpellChecker

Confirm WebSpellChecker Installation

Check the WebSpellChecker installation settings and click Install to proceed.

Samples

Start Menu folder:
    WebSpellChecker

Web server:
    Java Application Server (Apache Tomcat, Oracle WebLogic Server, etc.)

Full domain name:
    https://your_domain_name:8443

Virtual directory:
    spellcheck

< Back   Install   Cancel

2.12. As soon as the installation process is finished, select **Activate License** if you are installing WebSpellChecker Server for the first time and then click **Finish** to close the installation dialog. You can view the samples and verify application operability in newly opened web browser tabs, namely Samples page, a page with Status check, and a page with Version check. Note that all these options are selected by default. The **Activate License** option is not selected only if you reinstall WebSpellChecker on the same server.

Setup - WebSpellChecker

Complete Installation

WebSpellChecker has been successfully installed on the server. The application may be launched from Windows Start Menu folder.

1. Activate License and Start WebSpellChecker Application Server (Skip if already done).
2. Check the application version and status to confirm if the Spell Check, Grammar and Thesaurus engines are Active.
3. Open Demo Samples to learn more how integrate and configure the WebSpellChecker products.

- ☐ Activate License
- ☑ Run WebSpellChecker Application Server
- ☑ Check Application Status and Version
- ☑ Open WebSpellChecker Demo Samples
