

_appserverx_xml_Language

Description:	Language parameter defines a language ID, alias, and its options.
Parameter type:	String
Default value:	en_US
Possible values:	• Default languages short codes; • Additional languages short code.

```
<Language Id="en_US">  
</Language>
```

Besides, each language tag can have a list of sub-tags which allows defining additional language configuration specific to a particular language.
