_appserverx_xml_StripPossessives

Description:	**StripPossessives** parameter regulates whether possessive words endings 's and s' should be removed from the words before check spelling.
Parameter type:	Boolean
Default value:	1
Possible values:	0 – possessive words forms are checked for spelling. 1 – possessives of the form 's and s' are removed from words before check spelling.

> ⚠ By default, the main language dictionaries do not contain possessive forms of words. Thus, it is highly recommended to have the StripPossessives parameter enabled.

```
<StripPossessives>1</StripPossessives>
```
