

# Specialized dictionaries list

Starting WebSpellChecker version [5.17.0.0](#) we enabled English, Spanish, French medical dictionaries for appropriate languages and their dialects. The same is for legal dictionaries. The list of words from the specialized dictionaries are extended the default list of words, you do not need to do any additional configuration.

| # | Dictionary         | Language           | Words count<br>(WSC v5.6.0) | Comment     |
|---|--------------------|--------------------|-----------------------------|-------------|
| 1 | Medical dictionary | American English   | 204,932                     |             |
|   |                    | British English    | 157,743                     |             |
|   |                    | Australian English | 157,743                     |             |
|   |                    | Canadian English   | 157,743                     |             |
|   |                    | French             | 24,843                      |             |
|   |                    | Canadian French    | 24,843                      |             |
|   |                    | Spanish            | 5,201                       | NEW   5.6.0 |
| 2 | Legal dictionary   | American English   | 4,731                       |             |
|   |                    | British English    | 4,881                       |             |
