

_include_supported_languages

You may try to evaluate spell & grammar checking functionality for a chosen language on the [supported languages demo page](#).

Here is a list of all available and supported languages with their short codes.

- The language codes have the following format: [language_code]_[country_code].
- The next language and country codes standards have been used: [ISO 6391](#) and [ISO 3166-1](#).
- The default language for text check and localization of user interface is **American English**. If not defined explicitly, the interface language will be set based on the browser localization.

	Language	Spelling	Grammar	Country	Short code	Localization	Number of words	Comments
1	Auto Detect				auto			Auto-detect defines a language and sets a correct language for further check.
