WProofreader autocorrect not working in CKEditor 5 v.35

Problem

The autocorrect/auto-suggestion feature of WProofreader is not functioning properly with CKEditor 5 version 35.

Solution

The CKSource development team is actively working on resolving this issue. In the meantime, you can temporarily fix the problem by downgrading CKEditor 5 to version 33. For more information about the original problem, please refer to this link: https://github.com/ckeditor/ckeditor5/issues/13051.
