

What symbols are allowed for Dictionaries API?

On the WebSpellChecker version 5.28.4.0+ for both User and Custom Dictionaries APIs the following symbols are allowed:

- Apostrophe (0x0027), fullwidth apostrophe (0xFF07), full stop (0x002E);
- ANY letter or digit, except
 - modifier letter: <https://www.compart.com/en/unicode/category/Lm>,
 - letter number: <https://www.compart.com/en/unicode/category/Nl>,
 - other number: <https://www.compart.com/en/unicode/category/No>;
- ANY dash (hyphen): <https://www.compart.com/en/unicode/category/Pd>.

A word for the dictionaries is considered valid if it contains at least one letter. Words that consist solely of numbers, apostrophes, or any other non-letter characters are not considered valid.

If you identify any inconsistencies between the information presented and what appears on your end, please inform us by contacting our support team at support@webspellchecker.net.
